FOR IMMEDIATE RELEASE

**ODA Announces Open House and Public Meeting on
Nature Pure, LLC – Farm 1 Draft Permit**

REYNOLDSBURG, Ohio (Dec. 4, 2010) – The Ohio Department of Agriculture (ODA) will hold an open house and a public meeting on the draft Permit to Operate (PTO) for Nature Pure, LLC - Farm 1. The sessions will be held on Jan. 19, 2011, in the Raymond Elementary School gymnasium, 21511 Main St., in Raymond.

The open house, which begins at 6:00 p.m., is an opportunity for the public to talk directly with the ODA staff and ask questions about the permit. This is followed by a public meeting at 6:30 p.m. where interested parties can submit oral or written comments on-the-record concerning the draft permit.

Written comments can also be delivered or mailed to ODA Livestock Environmental Permitting Program, 8995 East Main Street, Reynoldsburg, Ohio 43068. These comments must be received by ODA no later than 5:00 p.m. on Jan. 26, which is five business days after the public meeting. Comments received after Jan. 26 will not be considered by the director before making a determination on the Nature Pure, LLC - Farm 1 final permit.

A copy of the Nature Pure, LLC - Farm 1 draft Permit to Operate can be reviewed and/or copies made at the ODA Livestock Environmental Permitting Program office. The permit can also be viewed at the Union Soil and Water Conversation District Office, 18000 State Route 4, Suite B, in Marysville. Those interested should call the SWCD office at (937) 642-5871 and make an appointment. Written comments cannot be submitted to the Union SWCD office.

Nature Pure, LLC - Farm 1 is located in Union County, York Township, at 26586 S.R. 739 in Raymond, Ohio. The farm, which owned by Nature Pure, LLC, is in the Upper Scioto Watershed.

Nature Pure, LLC - Farm 1 previously had the design capacity to house 380,000 pullets, but plans to reconfigure four buildings in its previous permit to house 344,000 pullets. The farm is using one of its houses to stock 239,000 caged pullets and will stock 35,000 cage-free pullets in the remaining building. Two buildings will be erected to replace the two buildings that have been demolished and will house 35,000 cage-free pullets each.

The draft Permit to Operate is a renewal application for the Review Compliance Certificate previously issued by the department in 2004 that was valid for five years. The PTO would also be valid for a five-year period, at which time the owner will be required to renew the operating permit.

The Permit to Operate is drafted to regulate operations with plans for manure management, insect and rodent control, mortality management and emergency response.

FOR IMMEDIATE RELEASE

ODA Announces Public Meeting on Rising Sun Dairy Draft Permits

REYNOLDSBURG, Ohio (July 14, 2011) – The Ohio Department of Agriculture will hold a presentation and public meeting on the draft permit to install and draft permit to operate for Rising Sun Dairy. The sessions will be held on Aug. 16, 2011, at the Newport Fire Station, 6770 State Route 38 SW, in Newport.

The presentation on the permits by the ODA Livestock Environmental Permitting Program staff will begin at 6 p.m., followed by a public meeting where interested parties can submit oral or written comments on-the-record concerning the Rising Sun Dairy draft permit to install and draft permit to operate.

Written comments can also be delivered or mailed to ODA Livestock Environmental Permitting Program, 8995 East Main Street, Reynoldsburg, Ohio 43068. These comments must be received by ODA no later than 5:00 p.m. on Aug. 23, which is five business days after the public meeting. Comments received after this date will not be considered by the director before making a determination on the Rising Sun Dairy final permits.

Copies of the draft permit to install and draft permit to operate for Rising Sun Dairy may be reviewed or copies made at the ODA LEPP office. The permits can also be viewed at the Madison Soil and Water Conversation District Office, 831 U.S. Highway 42 NE, in London. Those interested should call the SWCD office at (740) 852-4004 and make an appointment. Written comments cannot be submitted to the Madison SWCD office.

Rising Sun Dairy is located in Madison County (Union and Paint Townships) at 8500 Yankee-Chenoweth Road in London. The dairy, which is in the Lower Scioto watershed, is owned by Rising Sun Dairy, LLC, Assen Dairy, LLC and Ohio Milk Partners, LLC, and is operated by Pieter and Johannes Assen.

Rising Sun Dairy currently houses 699 dairy cows in two freestall barns. Under state law, the farm is allowed up to 699 dairy cows without requiring a permit from the department. The proposed expansion in the draft permit to install would allow the dairy to stock 2,558 dairy cows.

The Rising Sun Dairy expansion would consist of increasing the existing maternity barn, adding an additional maternity barn, extending the existing freestall barn, adding two new freestall barns housing 804 cows each and adding a 25.7 million gallon manure storage pond. The facility will also add a sand lane and stacking pad to remove the sand from the manure for reuse, reducing the volume of waste to be transported for land application.

Rising Sun Dairy has also been issued a draft permit to operate that provides plans for manure management, insect and rodent control, mortality management and emergency response for the entire farm. The operating permit would be valid for five years at which time the owners would be required to renew the permit.

FOR IMMEDIATE RELEASE

**ODA to Hold Open House and Public Meeting on
Draft Permits for Bowersock Pork**

REYNOLDSBURG, Ohio (May 16, 2014) – The Ohio Department of Agriculture (ODA) will hold an open house and public meeting on May 20, 2014, on the draft Permit to Operate (PTO) and draft Permit to Install (PTI) for Bowersock Pork. The open house will be held from 6:30 to 7:00 p.m. followed by the public meeting at the Salem Township Building, 21219 State Route 197, Spencerville OH 45887.

The department will provide an opportunity for recording public comments concerning the draft permits. Oral comments can be made in person and on the record at the public meeting. Written comments must be received by ODA no later than 5:00 p.m. on May 28th, which is five business days after the date of the public meeting. Comments must be delivered or mailed to ODA Division of Livestock Environmental Permitting (DLEP), 8995 East Main Street, Reynoldsburg, Ohio 43068. Comments received after May 28th will not be considered by the Director before making a determination on the permit.

The draft permits can be reviewed and/or copies made at the Division of Livestock Environmental Permitting (DLEP) office at: A.B. Graham Building, 8995 East Main Street, Reynoldsburg, Ohio 43068.

Bowersock Pork is located in Auglaize County, Salem Township, at 03097 State Route 197, Spencerville Ohio. It is owned and operated by Daryl Bowersock at the same address, and it is situated in the St. Marys River Watershed.

The facility consists of an existing cattle barn with a design capacity of 20 feeder steers and an existing finisher barn with a design capacity of 2,400 head of swine weighing more than 55 pounds. Liquid manure is stored in a concrete pit located below the floor of the finisher barn, providing approximately 850,000 gallons of storage capacity, or about 9 months' worth of storage. Solid pen pack cattle manure is stored in the steer barn, providing more than a year's worth of storage.

The draft PTI proposes to construct one new finisher barn to house an additional 2,400 head of swine. The proposed construction would bring the facility's total design capacity up to 4,800 head of swine weighing more than 55 pounds. The draft PTI includes construction of a concrete pit located below the floor of the new finisher barn. The concrete pit would be capable of

storing about 1 million gallons of liquid swine manure, which would be about 11 months' worth of storage. The facility proposes no changes to the existing cattle barn or the mortality composting structure, both of which can provide well over a year's worth of storage capacity.

The draft PTO includes plans to manage manure nutrients, prevent and control insect and rodent problems, handle emergency situations, and properly dispose of mortality losses. The PTO also includes an Operating Record that provides the forms and information that must be maintained by the facility to comply with ODA rules and the permit.

FOR IMMEDIATE RELEASE

ODA to Hold Open House and Public Meeting on Draft Permits for Wilker Eggs and Grain Farm

REYNOLDSBURG, Ohio (December 4, 2014) – The Ohio Department of Agriculture (ODA) will hold an open house and public meeting on January 6, 2015, on the draft Permit to Operate (PTO) and draft Permit to Install (PTI) for Wilker Eggs and Grain Farm. The open house will be held from 6:30 to 7:00 p.m. followed by the public meeting at the Saint Marys Township Building, 10752 State Route 364, Saint Marys, OH 45885.

The department will provide an opportunity for recording public comments concerning the draft permits. Oral comments can be made in person and on the record at the public meeting. Written comments must be received by ODA no later than 5:00 p.m. on January 13th. Comments must be delivered or mailed to ODA Division of Livestock Environmental Permitting (DLEP), 8995 East Main Street, Reynoldsburg, OH 43068. Comments received after January 13th will not be considered by the Director before making a determination on the permit.

The draft permits can be reviewed and/or copies made at the Division of Livestock Environmental Permitting (DLEP) office at: A.B. Graham Building, 8995 East Main Street, Reynoldsburg, Ohio 43068.

Wilker Eggs and Grain Farm is located in Auglaize County, St. Marys' Township, at 10675 Tri Township Road, St. Marys, Ohio. It is owned and operated by Ron and Deborah Wilker at the same address, and it is situated in the St. Marys River Watershed.

The facility consists of an existing layer house having a design capacity of 64,447 layers. Manure from the existing layer house is stored below the cages in a deep pit structure, with a pit providing well over one year's worth of storage.

The draft Permit to Install (PTI) proposes to construct a second layer house capable of housing an additional 252,720 layers, which would bring the overall design capacity of the facility to 317,167 layers. The new house would be constructed with belt-battery style cages, where manure will be transported out of the housing barn on a daily basis. Manure will then be stored in a separate manure storage barn that is planned with this draft PTI. The new manure storage barn proposed would be capable of storing approximately 157,000 cubic feet of manure, which will provide about 183 days of manure storage for the new layer barn. Plans are for all of the solid manure to be distributed off the farm to manure brokers and crop producers outside of the Grand Lake St Marys watershed that will utilize the manure as a replacement for commercial fertilizers.

The draft PTO includes plans to manage manure nutrients, prevent and control insect and rodent problems, handle emergency situations, and properly dispose of mortality losses. The PTO also includes an Operating Record that provides the forms and information that must be maintained by the facility to comply with ODA rules and the permit.
